PROFESSIONAL SUMMARY

Computer Science Engineering student (CGPA: 9.29/10) with 6 months of hands-on experience building production-ready AI systems, full-stack applications, and enterprise automation tools. Specialized in LLM integration, machine learning pipelines, and scalable web development. Proven ability to architect and deploy end-to-end solutions while collaborating in Agile environments.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, MATLAB
Web & Frameworks: React.js, Flask, FastAPI, HTML, CSS, JavaScript, REST APIs
AI/ML & NLP: TensorFlow, OpenCV, LLMs (Groq API, Meta-Llama), Sentiment Analysis, NLP, AI Inference
Databases & Tools: MySQL, Git/GitHub, VS Code, Tkinter GUI Development
PROFESSIONAL EXPERIENCE

Software Development & AI Intern

XDigics Technology Pvt. Ltd. | Dec 2025 – Mar 2026 (3 months)

Architected and deployed 5+ responsive React.js web applications improving frontend modularity by 45% and reducing component load times by 35%

Engineered LLM-powered content automation workflows integrating Groq API and Meta-Llama, automating domain-specific page generation and reducing manual content creation time by 60%

Optimized frontend architecture following Git-based workflows and Agile sprint cycles, improving team collaboration and code review efficiency

Python Development Intern

Epiroc Innovation & Technology Centre India | Jun 2025 – Jul 2025 (1 month)

Developed a Python-based XML File Modifier automating structured data updates for 500+ daily operations, eliminating 6+ hours/week of manual processing and reducing human error by 100%

Engineered an intuitive Tkinter GUI enabling XML upload, validation, editing, and export with support for complex schema modifications

Implemented robust XML parsing using ElementTree, handling edge cases and maintaining data integrity across all transformation operations

FEATURED PROJECTS

DeepShield – Multimodal Deepfake Detection System | [GitHub](#)

Architected end-to-end deepfake detection pipelines achieving 94% accuracy on benchmark datasets using EfficientNetB0, CNN+MFCC feature extraction, and TensorFlow

Engineered FastAPI backend with 4+ REST endpoints optimized for real-time inference on image and audio inputs with sub-500ms response times

Developed interactive frontend enabling users to upload media, visualize detection results, and interpret model confidence scores

AI-Powered Mental Wellness Chatbot | [GitHub](#)

Built Flask-based conversational AI integrating Meta-Llama via Groq API for emotion-aware mental health support with sub-1s response latency

Implemented sentiment analysis pipeline detecting user emotional states with 88% accuracy, enabling adaptive response generation tailored to emotional context

Designed conversation memory system enabling multi-turn contextual discussions, improving user engagement and response relevance

Deadlock Detection & Banker's Algorithm Simulator | [GitHub](#)

Developed interactive web application with real-time visualization of resource allocation, safe states, and deadlock avoidance scenarios

Implemented Banker's Algorithm for resource allocation simulation, demonstrating understanding of OS synchronization and system design principles

EDUCATION

B.Tech, Computer Science Engineering

Bharati Vidyapeeth (DU) College of Engineering, Pune | 2023–2027

CGPA: 9.29/10

Class XII | Science stream (PCM+Biology) | DAV Public School, Aundh, Pune | 2021-2023

Percentage: 81.8%

CERTIFICATIONS & LEADERSHIP

Certifications: [Intel Unnati Industrial Training 2025](#) | [NPTEL Design and Analysis of Algorithms](#) | [NPTEL DBMS](#) | [IIT Bombay Spoken Tutorial – Java](#)

Leadership: Design Head – GeeksforGeeks Campus Body | Social Media Head – Null Student Chapter | Student HR – CSESA
